

August 15, 1979

Memo to File:

RE: Gramlich Exploration Company
Grandview #1 -San Juan Group Claims
San Juan County, Utah
DOE/037/004

An attempt to visit this operation was made by Mike Thompson and Tom Suchoski of the Division staff on August 1, 1979.

A dirt road, leading to a series of roads and excavations, was found off the Bureau of Land Management road to Black Ridge approximately 1.5 miles from State Route 163. The total length of the dirt roads was estimated to be 2 miles. The total area disturbed by the roads and excavation is estimated to be 3 to 4 acres.

Most sections appear to be inactive, with no reclamation work being done.

The only area which was found to be active, that was visited, showed that sections of rock containing logs were being drilled out and removed. Equipment at the site consisted of a small bucketloader and an air compressor.

This operation needs to be followed up. An attempt to do so is being followed. Mr. Gramlich is being contacted to see if the above described operation is his.
